## **NOTICE OF ALLOWANCE**

### ***Drawings***

All objections to the drawings have been removed. The drawings are acceptable as they are currently presented.

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: In claim 3, line 8, prior to "base", replace "the" with --a--.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 3, prior art could not be found that taught a first semiconductor die having a first surface and an opposed second surface, the first surface being formed with a first cavity mounting the first semiconductor die on the first pedestal and second smaller cavity within the first cavity underlying a reactive component mounting region defined on the second surface. This limitation, in

conjunction with the other claim limitations, was neither disclosed in, nor suggested by, the prior art.

With respect to claim 17, prior art could not be found that taught a semiconductor die having a first surface and an opposed second surface, the first surface being formed with a recession, and the second surface being formed with a dielectric platform having a lower surface in the recession and an upper surface defining a reactive component mounting region coplanar with the second surface, and a reactive component formed on the second surface of the semiconductor die in the reactive component mounting region to overlie the recessed region of the raised appurtenance. This limitation, in conjunction with the other claim limitations, was neither disclosed in, nor suggested by, the prior art.

As to claim 18, prior art could not be found that taught a die attach mount comprising a die attach pedestal formed on the die mounting surface and configured to engage with a first semiconductor die having a cooperating recess formed in a rear surface where the die attach pedestal has a recessed region in a surface thereof for forming dielectric volume in cooperation with the rear surface of the first semiconductor die. This limitation, in conjunction with the other claim limitations, was neither disclosed in, nor suggested by, the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the attached PTO-892 all show the state of the art.
